EDUCATION

Shivalik University,Dehradun **Aug 2024 – Jul 2028**
Bachelor's Degree - Computer Science and Engineering - **CGPA – 8.15** Dehradun, Uttarakhand

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, MySQL
Technologies/Frameworks: React, Next.js, Express, Prisma, PostgreSQL, MongoDB, Docker, Linux/UNIX environments, AWS cloud Computing,
Tools: Git, GitHub Actions, Vercel, Postman, VS Code
Core Competencies: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, System Design, REST APIs

PROJECTS

Merch-Mind| GitHub | Live | **TypeScript, LangGraph, Nextjs, Supabase, Openrouter** **Feb 2026 – Jun 2026**

- an AI-powered Merchant Growth Agent that analyzes uploaded business data to identify revenue leakage, customer segments, product trends, and growth opportunities, then converts insights into actionable recommendations.
- Implemented an **agentic AI pipeline** combining schema discovery, data analysis tools, RAG, and LLM reasoning to transform raw merchant data into **high-confidence business insights** without requiring manual analysis.
- **Built** specialized AI workflows for **sales, forecasting, returns, catalog analysis, customer segmentation, and upsell/cross-sell opportunities**, turning merchant data into actionable insights.

Medcare | GitHub | Live | **TypeScript, Express, MongoDB, Docker, API** **Jan 2026 – May 2026**

- Developed a full-stack healthcare management platform enabling **patient and doctor management**, appointment scheduling, and centralized digital medical records.
- Implemented digital healthcare workflows for **prescription management, medical reports, and appointment tracking**, streamlining patient-doctor interactions.
- Architected and deployed the application using **Next.js, MongoDB, and Vercel**, delivering an accessible and scalable healthcare management solution.

DataWash RL Environment | GitHub | hugging face | **Python, OpenEnv, Pandas, Fast-API, Docker**

- Spearheaded the development of an **OpenEnv-based reinforcement learning environment** for automated data cleaning, enabling agents to iteratively detect and resolve **missing values, duplicates, inconsistent categories, and data-quality issues** across messy survey and tabular datasets.
- Designed **multi-step state, action, observation, and reward mechanisms** with Easy, Medium, and Hard tasks, allowing agents to learn efficient cleaning strategies while measuring improvements through **data-quality scoring and reward-based evaluation**.

COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Operating Systems
- Database Management Systems
- Software Engineering
- Machine Learning
- Discrete Mathematics
- Pattern Recognition

ACHIEVEMENTS

- Achieved Max Rating of **1204** on Codeforces; solved **300+** algorithmic problems on LeetCode in C++.
- **Led and coordinated cross-functional teams** while representing the institution in multiple national and international hackathons hosted by IITs, NITs, and other reputed organization

CERTIFICATIONS

- **AWS Cloud Computing Workshop:** Hands-on exposure to AWS EC2, IAM, S3 Buckets, and Auto Scaling, covering cloud infrastructure and deployment fundamentals.
- **MongoDB Certified Skills:** Completed four MongoDB skill certifications covering MongoDB Fundamentals, AI Agents, RAG Application Development, and Vector Search.
